

2/4-WAY ARTICULATING VIDEO SCOPE

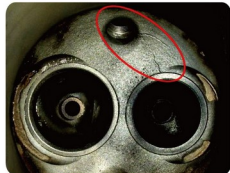

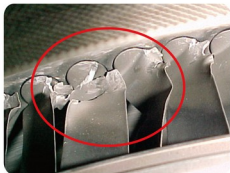

The Articulating Video Scope is still one of the most comprehensive and versatile video borescopes accessories on the market today.

Offering a wide spectrum of features designed to make inspections easier; the Articulating Video Scope system provides superior portability, image quality and ruggedness. It's like having an extra set of eyes so you can quickly obtain the defect information you need.

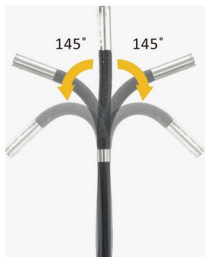

An articulating camera probe is essential and capable of checking a wind turbine gearbox, refinery heat exchanger or turbofan jet engine.

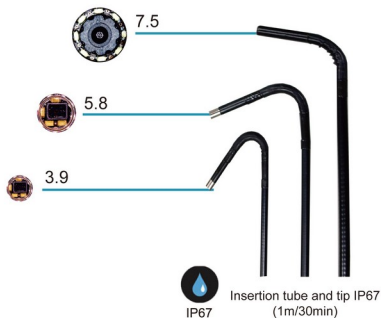

Clear viewing image inside turbine engines with high resolution and high brightness camera.

Available Probe Diameters

Bending Angle 270°
